Walls, Piers and Finials: Introduction

Material

All items are cast by hand in reconstituted stone using the dry cast method. Casts are porous unless treated and frost proof.

Colour

Casts are available in five standard finishes: Portland White, Bath Yellow, Cotswold, York, and Devon Red. All finishes age naturally taking on, over time, the patina of the surrounding lichens and mosses. A wide range of other colours and shades are available at a small additional cost.

Availability

Most architectural items are cast to order. Availability and delivery cost will be noted in all quotations.

Quotations

Please ask for a quotation - we can almost always return a firm quotation on the same day indicating price, delivery cost and availability.

Assembly

Gate piers and pedestals should be placed on a level footing of 8:1 sand to cement. Gate piers are hollow and will require reinforcements to support gates.

Prices and terms

All prices exclude VAT and delivery and are valid to 01/01/10. With the exception of account customers, or by prior agreement, payment is expected in full with each order.

Weights

All weights are approximate. Pier caps larger than 20" are partially hollow and the weights indicated are maximum weights.

Delivery

Delivery can be arranged to all destinations - including overseas destinations. Please ask for a quotation.

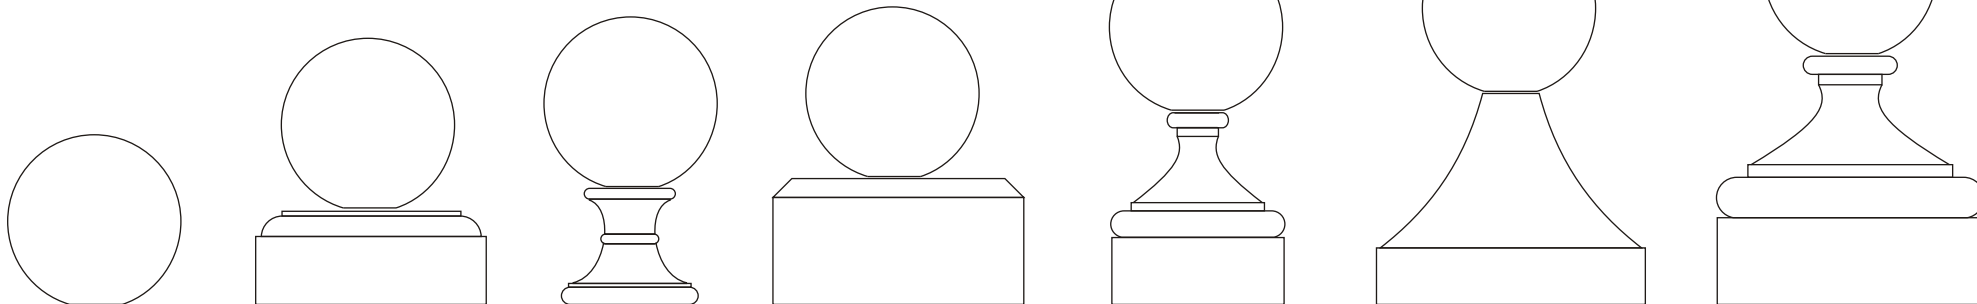

Bespoke work

Cranborne Stone has extensive experience of realising bespoke designs quickly and economically - please ask for a quotation.
